CHUCK WAGON®

brand DOG FOOD

VIDEO GAME CARTRIDGE

CHASE THE CHUCKWAGON

INSTRUCTIONS FOR USE

(1) Turn off your video game machine and insert a joystick controller into the left joystick slot.

(2) Insert the **CHASE THE CHUCKWAGON** cartridge in the cartridge slot.

(3) Turn video game machine **on.**

(4) To begin play, press the **select** switch to clear the machine and the **game select** switch to start.

(5) The object of the first maze screen is to move **Chuckie**, the dog, through the maze and escape through the opening at the top of the screen directly below the **Chuckwagon.**

(6) If you successfully escape from the maze, you will enter the reward screen.

(7) The reward screen requires you wait until the **dog dish** is even with **Chuckie** and then press the joystick fire button to allow **Chuckie** to move to the dish and eat. This will score an additional 100 points.

(8) If you miss, no points will be awarded and you will simply go ahead to the next maze screen.

(9) In each maze screen, there will be objects appearing on the screen and bouncing from side to side. These should be avoided. If they hit **Chuckie**, he will be frozen temporarily which will decrease your score.

(10) Also, in each maze, there is a **dogcatcher** who is chasing **Chuckie.** If he catches **Chuckie**, you will lose a life. You only have three to start with so be careful.

(11) When the game is over, your score will be displayed on the screen. It will be the total of each maze screen score and the total of each reward screen score.

Note: For a real challenge, start the game with the switch on the video game set at **expert.** This will only allow you thirty seconds per maze and the speed will be increased. Also, as the game progresses, the speed will increase.
